This is only an **ESTIMATE** of what the cost of your OB care will be with our office, and is considered for a "routine" pregnancy. All office visits (usually 10-14 visits), urinalysis, hemoglobins and one post-partum visit at 6-8 weeks after your delivery is included in the Global OB Care charge. We require a \$500.00 payment prior to receiving care at your initial visit. After your initial visit, we will contact you to set up a prepayment plan of your total estimated cost for this entire obstetrical episode which will need to be paid in full prior to your delivery.

The above charges are our general tests done throughout the pregnancy for a single gestational pregnancy (multiple gestational pregnancies will require additional tests and ultrasounds). **There may be additional lab work, ultrasounds or nonstress tests during the pregnancy which would be in addition to the charges above .** Hospitalization during the antepartum care of the pregnancy is also additional.

You will have four bills from your pregnancy:

1. Associates in Womens Health, L.L.C.
2. Hospital bill (Methodist Women's Hospital or CHI Health-Lakeside)
3. Anesthesiologist
4. Pediatrician

If you have any questions throughout your pregnancy regarding any billing issues you may call our billing department at (402) 614-8181. Thank you.
